Incident Report: IM-10281-Bookstore-Admin-login
Date: 10-12-2012

Executive Summary:
Prospersec was contracted by TTA Bookstore to conduct some penetration testing on the bookstores website. The main goal is to log in as an admin without using the password.

Application Details:
- **User Account:** admin@tta.bookstore

Attack Narrative:
      Looked at the information that was presented, and we reviewed what was presented. We used an SQL injection technique to gain access. The injection that i used was " ' or 1=1-- " in the users fill section and for the password section i just typed "password". With that it gave me access to the admin account.

Conclusion:
      Prospersec was contracted by TTA Bookstore to look for vulnerabilities. We have found that the site is vulnerable to SQL injections, and by that we were able to gain access to the Admin account. By gaining access to the admin account I would be able to change information and that can be catastrophic to the site's livelihood.

You successfully solved a challenge: Login Admin (Log in with the administrator's user account.)   X
